

MAYCON RODRIGUES

CV

Full Stack Developer

(21) 98998-3056
maycon.zng@gmail.com

PROFESSIONAL SUMMARY

Blockchain and Fullstack Developer with experience in building Web3 solutions, including DeFi, NFTs, DAOs, and Zero Knowledge Proofs. Independent builder, contributing to personal projects, hackathons, and open-source initiatives. Strong expertise in Stellar and Ethereum networks, developing smart contracts, integrations, decentralized infrastructure, and frontend/backend applications.

CORE SKILLS

- **Frontend:** Next.js, React, TailwindCSS, Shadcn UI, HTML, CSS, JavaScript, TypeScript
- **Backend:** NestJS, Node.js, JavaScript, TypeScript, .NET, Django, Flask, Spring Boot, REST/GraphQL
- **Blockchain:** Stellar (Rust + Soroban), Ethereum (Foundry, Solidity)
- **Infrastructure:** Docker, PostgreSQL, Supabase
- **Tools:** Git, GitHub, CI/CD, lazygit, Foundry, Hardhat, Soroban CLI

PROFESSIONAL EXPERIENCE

Blockchain & Fullstack Developer | Freelancer | 2023 — Present

- Development of personal products, MVPs, and Web3 solutions for clients and communities.
- Building smart contracts, backend, frontend, and blockchain integrations.
- Active participation in hackathons and open-source initiatives.

Product Support Engineer | VTEX | 2021 — 2025

- Worked as a Product Support Engineer at VTEX, ensuring the stability, reliability, and continuous improvement of the platform. Collaborated directly with developers and product managers to solve complex technical issues, provide high-level support, and help prioritize bugs, improvements, and critical incidents.
- Main responsibilities:
- Troubleshooting and resolving technical issues related to APIs, integrations, frontend, and backend.
- Providing advanced technical support to e-commerce teams and partner developers, ensuring a great platform experience.
- Acting as a bridge between engineering, product, and clients, bringing structured feedback for continuous improvement.
- Using tools like SQL, OpenSearch, Grafana, and code debugging to analyze logs and monitor production environments.
- Participating in product ceremonies, contributing with technical insights and improvement suggestions.
- Mentoring new team members, documenting processes, and developing internal solutions to optimize workflows.
- During my time at VTEX, I developed a strong understanding of SaaS architecture, scalability, and product improvement processes.
